TREASURER
Cuts & Marks Paid

Overview

The Volunteer Hours App routes every reimbursement request through three stages, each handled by a different person. A fourth, web-based path lets a superadmin manage the whole pipeline — approval and payment — from one screen.

Guide Section	Who It's For	What Happens
Part 1 – Submit a Reimbursement	Any volunteer	Requests payment for an out-of-pocket expense
Part 2 – President's Approval	President	Reviews and approves (or holds) each request
Part 3 – Treasurer's Payment	Treasurer	Cuts the check and marks the request paid
Part 4 – Admin Dashboard (Web)	Superadmin	Approves and/or cuts checks for any request from the CRM

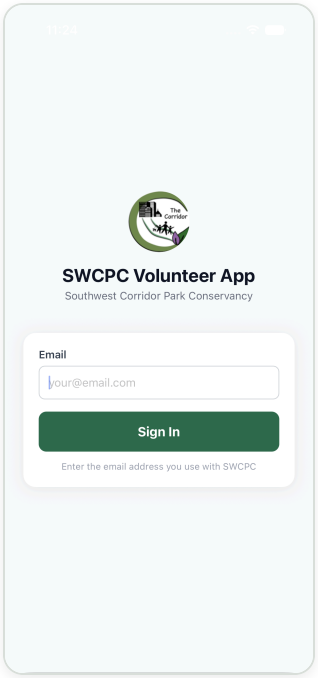

> As soon as a volunteer submits a request, the app automatically notifies both the president and the treasurer — no separate email or phone call is needed to start the process.

Part 1: Submitting a Reimbursement

VOLUNTEER

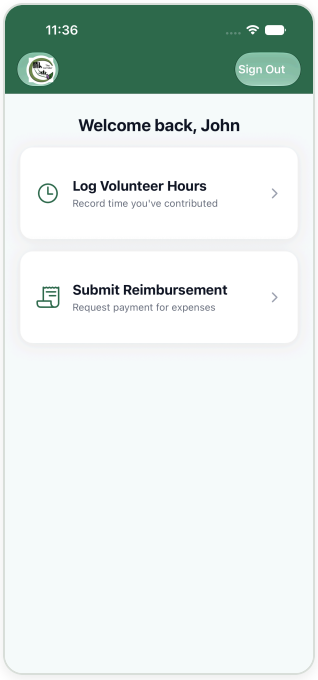

1 Sign in

Open the app and enter the email address on file with SWCPC, then tap **Sign In**.

2 Open Submit Reimbursement

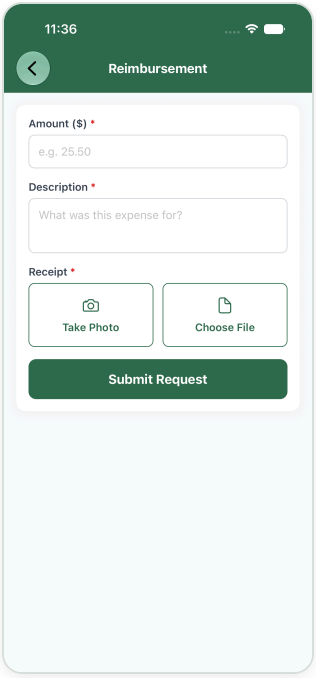

From the home screen, tap **Submit Reimbursement** ("Request payment for expenses").

3 Fill in the expense details

Enter:

- **Amount ($)** — the dollar amount you're requesting
- **Description** — what the expense was for

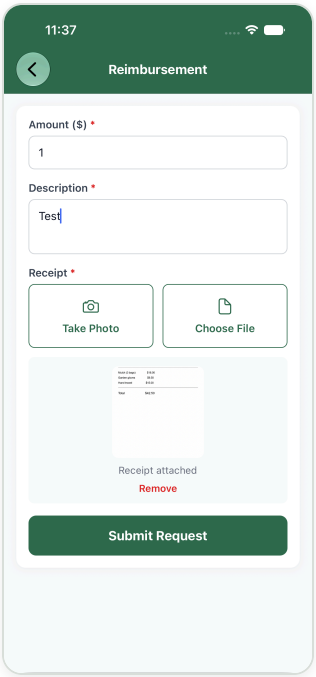

4 Attach a receipt

A receipt is required for every request. Choose one of:

- **Take Photo** — photograph the receipt with your camera
- **Choose File** — upload an existing photo or file

The form confirms **"Receipt attached"** with a preview, plus a **Remove** option if you need to redo it.

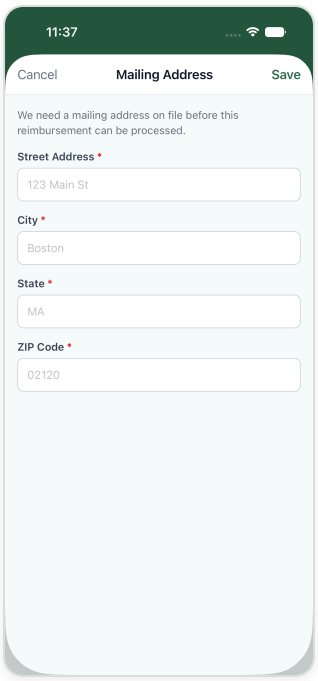

5 Add a mailing address (first request only)

If you have no mailing address on file, a **Mailing Address** form appears before your request can be processed — this is where the treasurer will mail your reimbursement check.

Enter your **Street Address**, **City**, **State**, and **ZIP Code**, then tap **Save**.

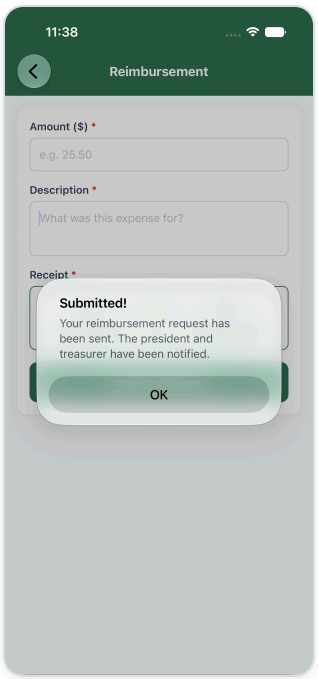

> This step only appears once. Future requests reuse the address already on file.

6 Submit and confirm

Tap **Submit Request**. A confirmation appears: "*Your reimbursement request has been sent. The president and treasurer have been notified.*"

Tap **OK** — your request now sits in the president's approval queue.

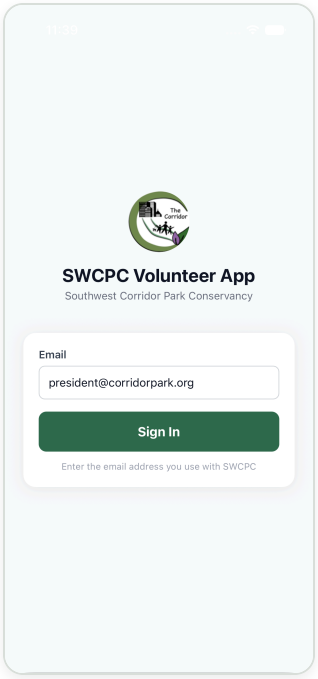

Part 2: President's Approval

PRESIDENT

Once a request is submitted, it lands in the president's **Review Reimbursements** queue for a first-line approval.

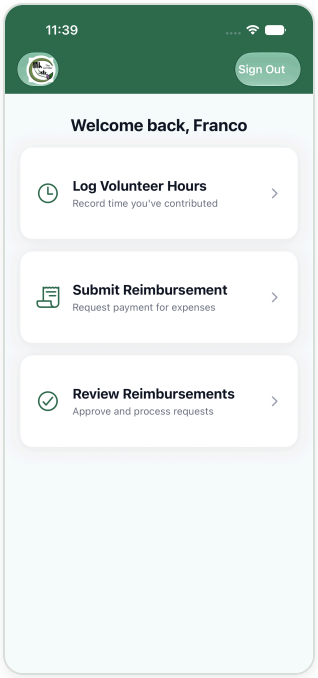

1 Sign in as president

Sign in with the president's SWCPC email address.

2 Open Review Reimbursements

Tap **Review Reimbursements** ("Approve and process requests") on the home screen.

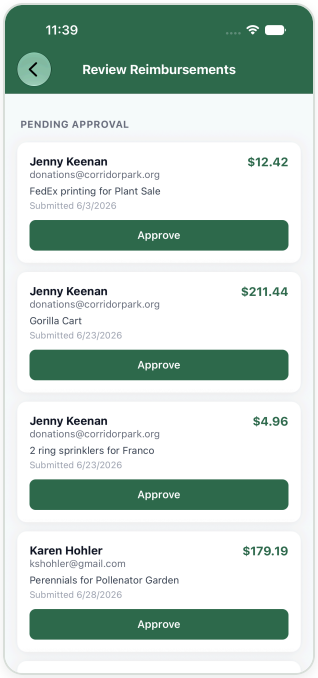

3 Review each pending request

Requests are grouped under **Pending Approval**, each showing:

- Volunteer's name and email
- Requested dollar amount
- Expense description
- Date submitted

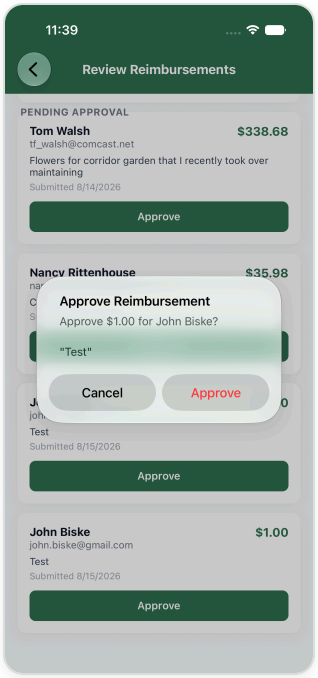

Check the description and amount against known volunteer activity before approving.

4 Approve the request

Tap **Approve** on a request card. A confirmation dialog repeats the amount, payee, and description — tap **Approve** again to confirm, or **Cancel** to back out.

Once confirmed, the request moves out of the president's queue and into the treasurer's **Awaiting Payment** list.

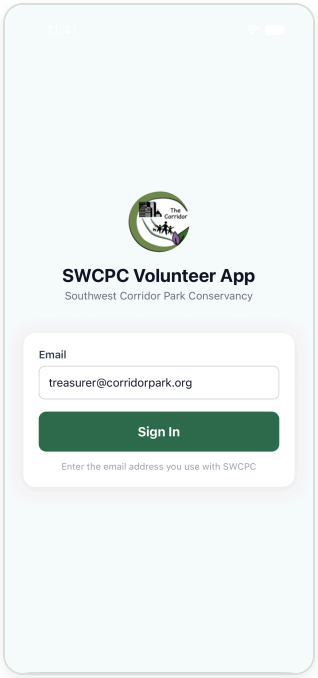

Part 3: Treasurer's Payment

TREASURER

After the president approves a request, it's the treasurer's job to cut the check and record the payment.

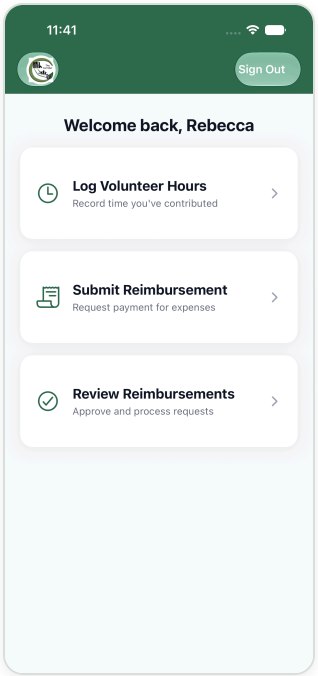

1 Sign in as treasurer

Sign in with the treasurer's SWCPC email address.

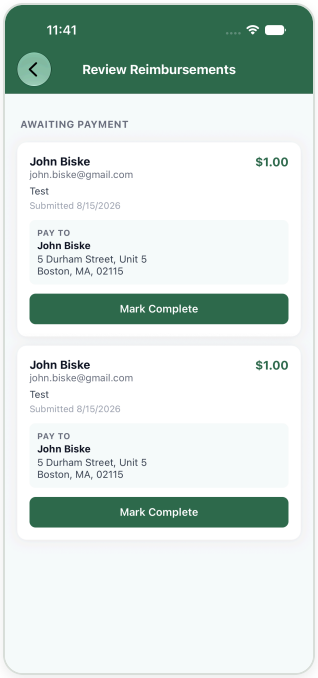

2 Open Review Reimbursements

Tap **Review Reimbursements** on the home screen — the same entry point used by the president, but the treasurer sees a different queue: approved requests waiting on payment.

3 Cut the check

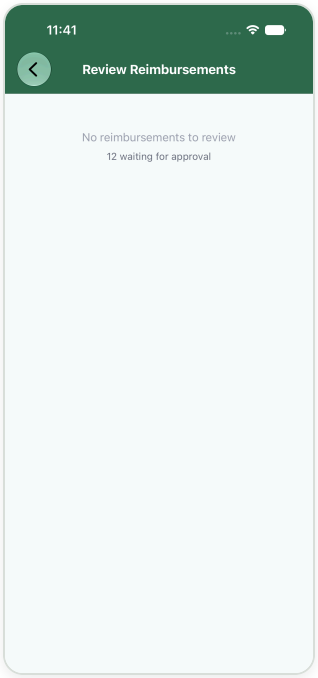

Requests appear under **Awaiting Payment**, each showing the amount, description, and a **Pay To** block with the volunteer's name and mailing address. Use this to address the check.

4 Mark the request complete

After the check has been mailed, tap **Mark Complete** on that request. It's removed from the Awaiting Payment list.

Once every request has been marked, the screen reads **"No reimbursements to review"** until the next one comes in.

> The number shown under "No reimbursements to review" (e.g. "12 waiting for approval") reflects requests still sitting with the **president**, not the treasurer — it's a reminder that the pipeline still has work upstream.

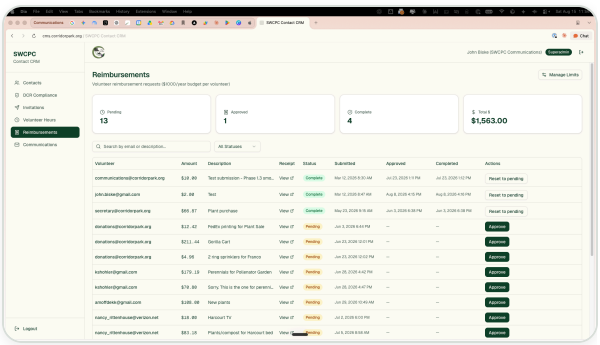

Part 4: Admin Dashboard (Web)

SUPERADMIN

Superadmins can skip the mobile app entirely and manage the full reimbursement pipeline — approval *and* payment — from the SWCPC Contact CRM at **cms.corridorpark.org**. This is the same underlying data as Parts 2 and 3; it's just a faster, single-screen way to work through the queue.

1 Open the Reimbursements dashboard

Sign in to the CRM and click **Reimbursements** in the left sidebar. The top of the page shows four summary cards:

- **Pending** — awaiting president approval
- **Approved** — awaiting treasurer payment
- **Complete** — paid and closed out
- **Total $** — sum of all reimbursements ever paid

Below that is a full table of every request, with a search box and a status filter. Each row shows the volunteer, amount, description, receipt link, status, and the submitted/approved/completed timestamps.

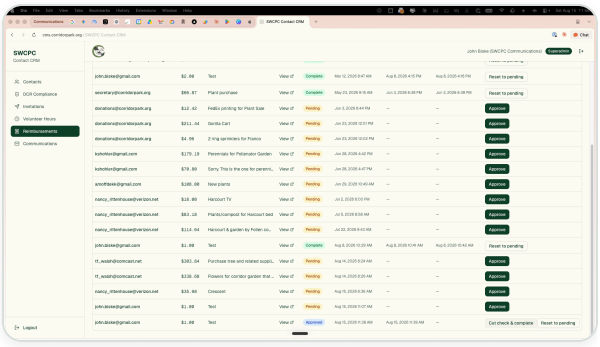

2 Approve a pending request

On any row with a **Pending** status, click **Approve**. This is the same approval the president performs in the mobile app — the request's status updates to **Approved** and it becomes payable.

3 Cut the check

On any row with an **Approved** status, two actions appear: **Cut check & complete** and **Reset to pending** (use the latter to undo an approval made in error).

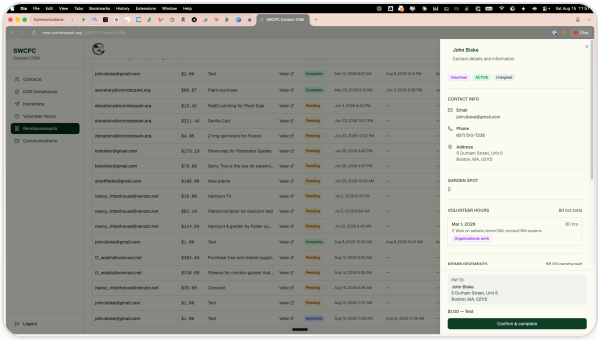

Click **Cut check & complete** to proceed.

4 Confirm and complete

A contact detail panel slides in showing the volunteer's contact info, logged volunteer hours, and reimbursement history, along with a **Pay To** block with the mailing address to write the check to.

Verify the address and amount, then click **Confirm & complete**. The request moves to **Complete** and is reflected in the Total $ figure at the top of the page.

> A request marked Complete can be reverted with **Reset to pending** from the main table if a check needs to be reissued or a mistake needs correcting.
